### The legend of the castle

in 1880, a child went into the castle, he never came out, so his parents went to the police station to ask for help. Once the police were notified they searched the place of disappearance, 2 years later they found the little boy in the hall of the castle, cut in two parts, venturing further, they glimpsed on a beast look with red eyes .

The two policemen pointed their lamps at the eyes and saw a clown with an axe, ready to cut them, the policemen were terrified and ran away; since then the clown has never been seen again
